Fictional example

Proposed customer document

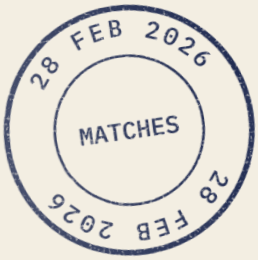

Evidence record

Monthly supply comparison for FLD.

Result

Matches

28 February 2026 at 12:00 UTC

Issuer report	Chain reading
1,040,000 FLD	1,040,000 FLD
Difference	**Coverage in this example**
0 FLD	2 of 2 native contracts

Illustrated reporting moment

28 February 2026 at 12:00 UTC

The example covers 640,000 FLD on Example network A and 400,000 FLD on Example network B. Both readings use the same illustrated moment and counting basis.

What the record covers

Supply for the stated scope and moment. Reserves are outside this check.

FLD, its networks, blocks, contracts and readings are fictional.

Questions and explanations

Illustrated review question
Do the issuer figure and chain reading include the same native contracts?

Illustrated answer
Yes. This example includes both fictional contracts and compares them at 12:00 UTC on 28 February 2026. References E01 to E04 record that scope.

Record history

01 MAR 2026 — **Example version 1**
Initial illustrated comparison. Result · Matches.

Later explanations and corrections would be added as dated notes linked to the original record. The original remains available, and any revised conclusion points to the evidence that changed it.

> A missing reading remains missing. It is never entered as 0.
